

PRICE LIST FOR CHEMOTECHNIQUE PRODUCTS

Valid from 1st February 2026 to 31st January 2027.

In principle, please contact AllerDerm Caribbean Ltd for a quotation for each contemplated purchase. However, overleaf is a Nominal Price List for most Series and hapten tier prices., but not the ~550 individual haptens.

- Note all prices are stated in USD for the Caribbean region. Prices can also be quoted in GBP or EUR on request.
- Global Recommended Retail Prices are set by Chemotechnique Sweden in SEK with effect from the 1st of February of each year, in order to have a more-or-less uniform price for the products around the world.
- AllerDerm Caribbean complies with the Chemotechnique Global Recommended Retail Price, then converted from SEK to USD at the date of Quotation for the purchase by a client.
- The usual procedure for Chemotechnique in setting the new Global Recommended Retail Prices is to calculate with the annual Swedish rate of inflation, which is usually 2-3%. For the change from 2025 to 2026, this is indeed just **2%**.
- Accordingly, nominal Retail prices for the Caribbean region stated in this Retail Price List in US\$ have been calculated from the 2026 Retail Price List in Swedish Kronor (SEK) currency stipulated by manufacturer Chemotechnique of Sweden, and converted by AllerDerm Caribbean Ltd at the forex rate on 31/01/2026 of **SEK 8.925** to the USD (via www.xe.com). As the forex rate on 31/1/2025 was 11.098 SEK to the USD, there has therefore been a *de facto* devaluation of the USD against the SEK of 19.6% over the past 12 months, which has led to a corresponding increase in prices when quoted in USD. Note this is not so much an appreciation of the SEK, but more a devaluation of the USD against the SEK, and similarly against other major currencies; 10.2% against the GBP and 13.6% against the EUR. However the exchange rate between the USD and the East Caribbean Dollar (XCD) has remained unchanged over the 12-month period at 2.70.
- For your presumed order, a formal Price Quotation is requested from Chemotechnique, originally in SEK but converted to USD (and GBP and EUR) on the date of Quotation. Therefore there may be a slight difference in the price stated in the Quotation from the price stated in the 2026 Nominal Retail Price List (this document). The prices stated in the Quotation are applied to the purchase.
- Note that as certain series may have changed their number or identity of haptens during the year, then prices will have been recalculated accordingly.
- The formal Quotation will include also the delivery cost from Chemotechnique Sweden to you, and the cost of the special temperature buffered packaging.
- Prices stated overleaf do not include delivery from Chemotechnique Sweden direct to the Purchaser, nor the cost of the special packaging. These will be charged at cost and are included in the Quotation from AllerDerm Caribbean Ltd.
- Prices stated overleaf do not include any Customs duties, taxes, fees, etc., that may be imposed by the country of receipt of the delivery. Nor are Customs agent's fees included. These costs are all the responsibility of the purchaser.
- Please notify us if you already have an account with the courier or freight forwarder that you wish us to use. Using your own courier account or freight forwarder may greatly simplify Customs clearance and the delivery process.
- Chemotechnique usually use UPS couriers, and nowadays always send haptens by cold chain.
- Full payment to AllerDerm Caribbean Ltd must be made with the order.
- Anticipated delivery lead time is 1-2 weeks, from Chemotechnique Sweden to the Purchaser.
- The purchaser is responsible for their own compliance with any relevant legal and medico-legal regulations, though AllerDerm Caribbean Ltd will assist as much as reasonably possible.
- For further useful information please see Supplementary Information Sheet 2026.
